Average Annual Total Returns as of: 12/31/2018 (shown in percentages)

The performance data quoted represents past performance. Past performance does not guarantee future results. For month-end performance which may be lower or higher than the performance data shown please call 800-525-4225. Investment return and principal value of an investment will fluctuate so that, when sold, an investment may be worth more or less than the original cost.

The performance numbers listed below reflect the total Separate Account charges associated with each investment option including a 0.20% a daily asset charge which is assessed against all funds except the Voya Fixed Account. These performance figures also assume the reinvestment of all dividends (ordinary income and capital gains) and are net of management fees and other fund operating expenses.

In addition to the daily asset charge which is noted above, participant accounts are also assessed a \$2.00 account fee per month and a 0.0375% asset based fee each quarter by TASC for their administrative services on your VEBA account. These fees are assessed by TASC for its account administration services and are not reflected in the performance figures listed below. These fees are withdrawn from your account on a pro-rata basis based upon your accounts asset allocation. For further details on these fees, please contact TASC at (866) 678-8322.

Depending upon the type of contract in which you participate, you have either received disclosure booklets for the separate account and/or fund prospectuses. You should consider the investment objectives, risks and charges, and expenses of the variable product and its underlying fund options carefully before investing. The disclosure booklet contains this and other information. Anyone who wishes to obtain a free copy of the separate account disclosure booklet and/or fund prospectuses may call their Voya representative or the number above. Please read the separate account disclosure booklet and/or the fund prospectuses carefully before investing.

Returns less than one year are not annualized. Fund Inception Date is the date of inception for the underlying fund, and is the date used in calculating the periodic returns. This date may also precede the portfolio's inclusion in the product.

The risks of investing in small company stocks may include relatively low trading volumes, a greater degree of change in earnings and greater short-term volatility.

Foreign investing involves special risks such as currency fluctuation and public disclosure, as well as economic and political risks.

Some of the Funds invest in securities guaranteed by the U.S. Government as to the timely payment of principal and interest; however, shares of the Funds are not insured nor guaranteed.

High yielding fixed-income securities generally are subject to greater market fluctuations and risks of loss of income and principal than are investments in lower yielding fixed-income securities.

Sector funds may involve greater-than average risk and are often more volatile than funds holding a diversified portfolio of stocks in many industries. Examples include: banking, biotechnology, chemicals, energy, environmental services, natural resources, precious metals, technology, telecommunications, and utilities.
